deliver IT
Advanced Feed & Bunk Management

Gain The Edge When It Comes To Feed Efficiency.

deliverIT provides feed managers all information needed to **monitor intakes, improve efficiency and evaluate driver performance.**

Real-time data capture and display makes it easy to rebalance ration composition and adjust feed calls by head or pen, on an as-fed or dry matter basis.

ITS LIVESTOCK

Why deliverIT?

deliverIT is designed to improve your bottom line by helping feed managers improve efficiency, monitor intakes, and analyze drivers to ensure every load is built right.

With commodity costs skyrocketing, don't let incorrectly loaded rations hurt your bottom line. **Get the load right and the right cattle fed every time.**

➤ **Real-time** data capture and display

➤ **Reduce** loading variances

➤ **Easily** rebalance ration compositions

➤ **Enhance** driver performance and accountability

- **Call and deliver feed** offline

- **View progress** over one feedlot or multiple locations

- **Seamless** recording of ration mix time & target composition

CATTLE FEEDING
SIMPLIFIED.

At ITS Livestock, we combine passion for technology & agriculture with the highest standard in customer service, putting our clients at the heart of everything we do, every day we do it.

Our easy-to-use software is designed to help cattle feeders become more efficient & profitable with access to real-time data for more informed decision making.

What Customers Are Saying:

"When we're talking about cutting costs, labour, not having to do hours of paperwork, being able to view instant data, accurate treatment info, **I just don't see why a person wouldn't want to use ITS software.**"

-Andy Boersma
Feedlot Manager, TFS Expanse
