- Precise ration management and delivery
- Increased driver management and accountability
- Recording of actual target ration composition
- Multiple truck view / feeding progress over entire feedlot
- Micro mill and batch box integration

deliverIT

Complete Bunk and Feed Management

deliverIT and **feedCALL** work together to provide feed managers with the information required to improve their feed efficiency, monitor intakes, and analyze drivers to ensure every load is built right.

Update feed calls based on daily changes, adjust your calls by head or by pen on an as fed or dry matter basis.

feedCALL can be used in your office or right from your truck in **deliverIT** with our Mobile Feed Call.

Get the right load and right cattle fed **every time!**
