treatIT

Complete Health and Traceability Management

treatIT provides a fully integrated solution that ties together feedlot performance and individual animal data to effectively manage today`s traceability requirements while keeping the focus on the profit line.

Being a leader in traceability is a key to future opportunities. treatIT has capabilities that no other software solution can match.

Why treatIT?
treatIT is flexible, integrated and powerful. This strength comes from input from a variety of creative minds and a desire to push the limits.

treatIT has allowed some of the leading feed lots in Canada to:

✔ Qualify for new export markets and collect the associated premiums

✔ Improve health management and reduce drug costs

✔ Decrease over-weight discounts

Take Advantage of Funding opportunities when available!
Our treatIT Software might qualify for current or future funding programs where full traceability is an eligibility requirement.
