treatIT

Animal Health Management

- Animal Performance Records
- Unsurpassed Sorting Options
- Treatment and Processing Protocols
- Accurate Withdrawal Schedules

Easily Manage Animal Performance and Health Data.

Flexible and fully integrated, our **treatIT** module, combined with **feedIT** is a powerful animal health tool with capabilities no other software can match.

We will work with your vet and nutritionist to ensure our software is set up to accurately and efficiently track and manage animal health in your feedlot.

Why treatIT?

treatIT provides flexibility for group or individual animal processing, ensuring treatment protocols are followed while keeping the focus on profitability.

This is a powerful, flexible program that has allowed leading feedlots to qualify for new export markets and collect associated premiums while enhancing animal health management, reducing drug cost, and improving efficiency.

➤ **Simplify** health management

➤ **Reduce** drug cost

➤ **Powerful** weight management

➤ **Effectively manage** traceability requirements

➤ **Advanced control** of treatment & processing protocols

➤ **Accurate** withdrawal management

- Low Frequency (LF) and Ultra High Frequency (UHF) electronic ID support

- **Seamless integration** with Te Pari's Revolution Dosing Gun

- Carcass data reporting

- **Record data accurately** without having to touch the PC

ITSGLOBAL
Integrated Traceability Solutions

At ITS Global, we combine our passion for technology and agriculture with the highest standard in customer service, putting our clients at the heart of everything we do, every day we do it.

Our easy-to-use, industry leading software is designed to help cattle feeders become more efficient, profitable and sustainable with cutting-edge data management and more informed decision making.

What Customers Are Saying:

"When we're talking about cutting costs, labour, not having to do hours of paperwork, being able to view instant data, accurate treatment info, I just don't see why a person wouldn't want to use ITS software."

-Andy Boersma-
Feedlot Manager, TFS Expanse
